1   Introduction

1.1 Overview

This guide will cover the processes required to manually add the Alvey Chain RPC into metamask. This is required to view your ALV and other tokens built on Alvey Chain.

Although screenshots and processes covered in this guide are shown on PC, the processes remain the same on mobile. Please follow the guidance in you MetaMask or TrustWallet browser.

1.1.1 Role and Responsibilities

It is a users responsibility to do your own research (DYOR). Please do not invest more than you are willing to lose.

2   How to add Alvey Chain RPC to MetaMask

2.1 Open your browser

Open your browser and connect to your metamask extension. At the top left of the screen, you will see a drop down list of blockchains to connect to. At the bottom of the list is the option to "Add Network", the user must select this.

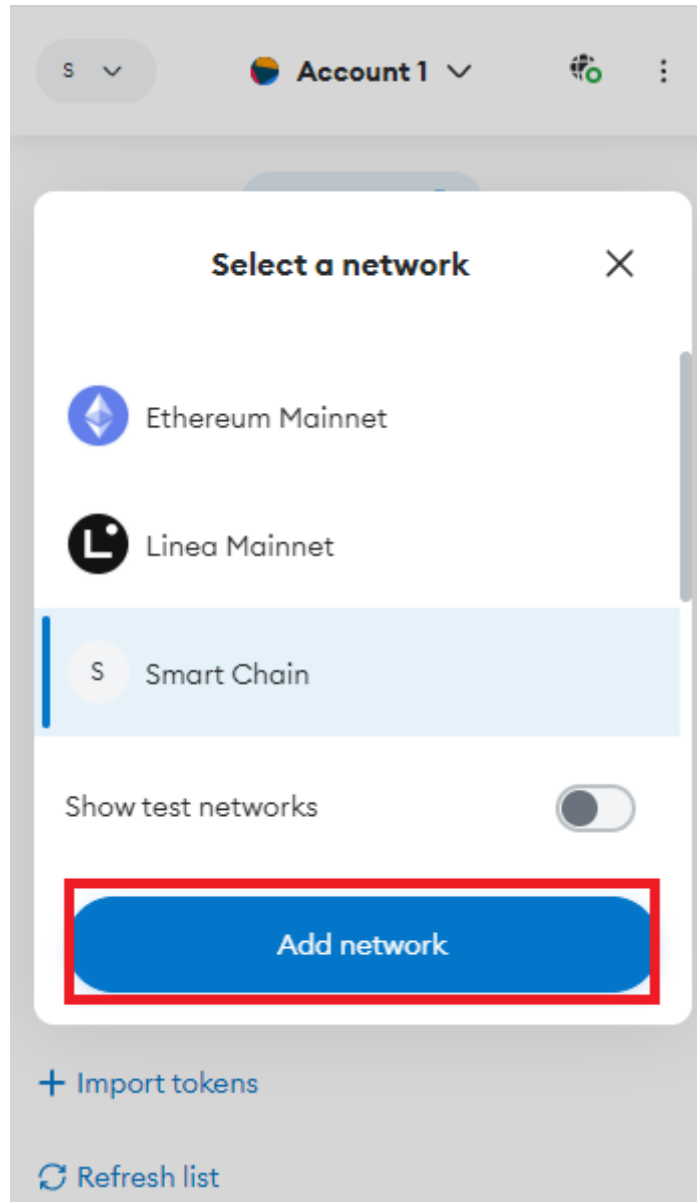

Figure 1: Add Network

2.2 Add Alvey Chain RPC

Once the user has selected "Add Network" they will be taken to a MetaMask webpage, this will provide the user with a list of additional networks to add to their metamask account. At the bottom of this list is the option to "add a network manually".

Figure 2: Add a network manually

Once the user has selected to add a network manually, they should input the following information.

Network Name: AlveyChain
RPC URL: https://rpc.alveycoin.com/rpc
Chain ID: 3793
Currency: ALV
Block Explorer: https://alveyscan.com/

Figure 3: Add RPC Information

Once the user has added the RPC information, they must then select save. This will then add the Alvey Chain Network to their MetaMask.
